

Course Guide Information and Quick Steps

What is the Course Guide?

- The Course Guide (CG) is a Web application that is available for students at <http://onestop.umn.edu>
- The CG is used by students and advisers to understand how a specific instructor will teach a class
- The intent of the CG is for the student to make a more informed choice when selecting a course
- The CG also gives instructors and departments the ability to more actively promote courses
- The new entry system replaces the old Web form. CG information is now entered directly into the system and is available to students on the Web the next day
- The new CG is available for graduate and undergraduate courses, and for fall, spring, and summer terms
- Course information will now roll forward from term to term!

Who Enters Course Guide Information?

- Primary Instructors of record may enter their own course guide information on the web at <http://onestop.umn.edu>. Select “Faculty,” then “Course Guide”**
- CG access has been granted to *Departmental Scheduling Coordinators/DSC* who currently schedule through E-Course Scheduling (ECS). New DSC staff access will be granted CG access upon completion of ECS training and the Access Request Form. Staff will enter Course Guide information directly into PeopleSoft at Curriculum Management>UM Course Guide**

Training documentation and production support are provided by the Student Records Training Team:

- E-mail: srhelp@umn.edu
- Phone: 612-625-2803
- <http://training.asr.umn.edu/records/>

Initial Course Guide Set Up

All classes that previously had course guide information entered into the old course guide have been converted to the new Course Guide.

If a course is set up as a *staff only* course, on the “UM Course Guide Staff Setup” page, primary instructors will -not- have access to enter course guide information. This may be overridden to allow a particular section/s to have information entered by the instructor on the UM Course Guide – Dept/Admin page, provided the instructor is set up as the primary instructor of the course.

UM Course Guide Staff Setup page:

Curriculum Management > UM Course Guide > UM Course Guide Upgrade > UM Course Guide Staff Setup

Course Guide Staff			
Course ID:	002041	Subject Area:	PHYS
Course Offering Nbr:	1	Catalog Nbr:	1001W
Find View All First ◀ 1 of 1 ▶ Last			
Effective Date:	10/10/2000	Status:	Active
<input checked="" type="checkbox"/> Staff Course Guide only			

- Checked allows only staff entry unless overridden on UM Course Guide – Dept/Admin page.
- Unchecked allows entry by instructors set up as “primary” instructors.

UM Course Guide – Dept/Admin page:

Curriculum Management > UM Course Guide > UM Course Guide Upgrade > UM Course Guide – Dept/Admin

UM Course Guide – Dept/Admin search page

UM Course Guide - Dept/Admin

Enter any information you have and click Search. Leave fields blank for a list of all values.

Course Guide Description (3,000 character limit)

Class Description: This course provides an introduction to the study of comparative politics, which is the study of politics in countries other than the United States. Nevertheless, in this course we will frequently compare and contrast politics in the US with politics elsewhere. The object of comparative politics is to understand how different peoples around the world seek to establish a durable and legitimate political system, how they seek to contest the legitimacy of and attempt to transform that system, and how they seek to benefit from that system. Given this definition, after we define concepts that are central to the study of politics, in this course we explore the following four themes: 1. Establishing effective political institutions; 2. Structuring political participation and contestation; 3. Constructing collective political identity; 4. Fostering development - the relationship between politics and economics.

Catalog Description

Introduction to political life in all its worldwide variety. Focus on repression, democracy, rights, corruption, gender, and political change. Guest lectures by political science professors who are experts on different parts of the world. Non-majors welcome.

Note: Students are more likely to choose classes that fit their learning styles if they can see a syllabus, instructor bio, a video clip showcasing your teaching style, or an example of multimedia used in your course. Students in online courses who do not have the opportunity to meet you face-to-face will especially benefit from making a personal connection online and seeing your enthusiasm for your course or discipline.

Instructions: Select the "Upload" button to upload the object, select the "Test URL" link to check the Web link to the object, or select the "Delete" button to delete your object. Select the "Retrieve URLs" button to retrieve the URL of the object after you upload it. Select the links in the "Media Type" column to learn more about each media type.

Instructions:

Submit to Course Guide

This course is combined with the courses listed below. Check "Copy" if you would like to copy the course guide information to that course. All course guide information with the exception of the Media Upload objects will copy to the other classes in the combined section. Or check "Do Not Copy" if you do not want to copy the course guide information to that course.

Tip: If course guide information varies slightly within combined courses, check the "Copy" box to copy the information to the other course, then go into the other course and make any additional changes.

If no classes are listed below, this class is currently the only class in the combined section. Contact your department to add other classes to the combined section or to remove this class from the combined section.

Courses with STAFF in the name column have generic course guide information. They cannot be updated by instructors. Contact the department if you have questions.
